

For Natural Gas and
Liquefied Petroleum Gas

SLEEVED POLYETHYLENE-COATED SOFT COPPER TUBING

THE ULTIMATE PROTECTION FOR GAS LINES

GAS-TEC PLUS™

Kamco

GAS-TEC PLUS™

Extra Protection PLUS Easy Removal

Nominal Size	Outside Diameter	Lengths
1/4"L	3/8" G/Gas	60' & 100'
3/8"L	1/2" G/Gas	60' & 100'
1/2"L	5/8" G/Gas	60' & 100'

For special application gas installations, there is no simpler product available. Kamco is proud to introduce *Gas-Tec Plus™*, yet another innovative product designed from customer-driven research and development. *Gas-Tec Plus* combines Kamco's *Gas-Tec®* tubing with a high density polyethylene (HDPE) sleeve. This now eliminates the hassle and expense of on-site sleeving in areas where our factory-coated copper tubing needs additional protection. And when the tubing is buried under concrete, not only is the inner tube protected from any damage, but if necessary, *Gas-Tec Plus* allows for quick and easy removal of the tubing without having to jackhammer the concrete. Call us toll-free at 1.800.891.0800 for more information.

THE STRENGTHS OF *GAS-TEC®*

THE PROTECTION OF FACTORY SLEEVING

Can be used both above and below ground

Protects copper from corrosion

Continuously line marked for clearer identification

Easy to install - no additional training required

Uses standard flare fittings

Economical

Eliminates on-site sleeving for special applications

Protects tubing from exterior physical damage (flowers beds, door thresholds and high traffic areas)

Quick and easy removal of tubing from concrete if necessary

Durable high density polyethylene sleeve (HDPE)

Time & cost savings

Customer Driven Quality.

Customer Driven Service.
